Hi, all I've build a model in ansoft Q3D,when the simulation is finished,I right click Analysis to export the equivalent circuit, the format of the file is \*.cir. The problem is I don't know how to use this \*.cir file in ansoft designer or other softwares,so I can see how the quivalent circuit is and do some comparison with the results of HFSS.

**How to use exported equivalent circuit of ansoft Q3D?**  
We use Q3D Extractor early in the design process to accurately model critical components, which helps us avoid costly design turns and, therefore, get to market sooner." Q3D Extractor v6 features the Ansoft Desktop, an intuitive, easy-to-use, design environment already familiar to HFSS v9 and Ansoft Designer customers.
