BMW M42 and BMW M44 DOHC engines. The M43 was produced at the Steyr engine plant. A version using natural-gas was produced for the E36 318i and the E34 518i.

BMW M43 - Wikipedia

This noise developed a few days ago. Does anyone know what it is? The smaller crankshaft ventilation hose is broke, and temporarily patched up, but the noise started a while after it has been broken.

BMW 325is (e36) Engine Noise

The M43 powered base-model cars, while higher performance models at the time were powered by the DOHC M42 (and its M44 successor).A variant using natural-gas was produced for the E36 318g and the E34 518g.Compared with its M40 predecessor, it features a dual length intake manifold (called "DISA" by BMW) to provide torque across a wider rev range, knock sensing and a timing chain (instead of the M40's timing belt).The M43 was produced at the Steyr engine plant.

BMW M43B18 engine reliability, problems and repair. M43B18 is 4-cylinder straight engine from M43 series as well as M43B16 and M43TU. This motor was produced in 1992 as replacement to already existing M40B18. The main difference between M43B18 and M40B18 includes practically the same block of cylinders, lighter crankshaft which now has only 4 counterweights in comparison with 8 units on the ...

BMW E36 Knock Sensors | BMW E36 Blog

My 95 M3 has 173,000 I have noticed a ticking, I brought to a BMW dealer to have it checked. They are claiming that it has a defective oil pump, defective lifter and defective head gasket. They estimated the repair at \$5,000 Ouch! They also claim the oil pump and/or the lifter could stop at any time causing catastrophic damage to the engine.
