SOLUTIONS has a major focus on an intensive dialogue and collaboration with relevant stakeholders and the general public. To this end, the project wants to provide solutions for water and chemicals management that safeguards a good status of European water resources and prevents toxic risks by mixtures of legacy, present and future pollutants.

### **Solutions Project**

What is a solution? A solution is made when a solid (which we call a solute) dissolves into a liquid (that we call the solvent) One example of a solution is salt dissolved in water. The salt and water can be separated again by evaporation ( the water will evaporate if left in a hot place leaving the salt behind ).
